SUMMARY

B.Tech Computer Science student focused on Machine Learning and AI, with experience in Python, web development, data visualization, and databases. Active in tech communities with leadership roles and hackathon achievements, seeking internships to build impactful AI solutions.

PROJECT

Capital Compass AI

- Developed an AI-powered financial guidance system using LangGraph and Retrieval-Augmented Generation (RAG) to deliver personalized investment and savings recommendations.
- Built a context-aware pipeline that analyzes user inputs and retrieves relevant financial data for dynamic insights.
- Integrated large language models with backend services to enable real-time, adaptive recommendation generation.
- Designed scalable workflows to support multiple concurrent user queries with low-latency responses.

Domain Forge AI – Website Redesign

- Built an ML-powered web platform using React and Django to analyze 500+ user interactions and deliver real-time layout recommendations.
- Processed user behavior data to identify patterns, improving UI/UX decision-making and user engagement.
- Integrated frontend with backend AI services via REST APIs, enabling seamless real-time communication.
- Optimized system performance to achieve low-latency responses (<200ms) for real-time recommendations.

EDUCATION

B.Tech in Computer Science

Vignan Institute of Technology and Science • 2023 – 2027 • 9.85 / 10

Intermediate – Class 12

Narayana Junior College • 2021 – 2023 • 97.4%

Secondary School Certificate – Class 10

SR Digi School • 2021 • 10.0 / 10

CERTIFICATIONS

NPTEL – Computer Science Fundamentals

Cisco – Python and C Programming

Tableau – Data Visualisation

Cambridge English – Professional Communication

INVOLVEMENT

Executive Member

Hyderabad • Computer Society of India (CSI) • 2024 – Present

- Mentored junior students in programming and supported technical workshops under CSI Hyderabad Chapter and NSS.
- Coordinated and executed technical and cultural events, ensuring seamless planning and logistics.
- Participated in coding challenges, technical quizzes, and project exhibitions, demonstrating strong problem-solving skills.
- Secured top 10 rankings in multiple college-level hackathons.

SKILLS

Languages: C Programming, Python, Java

Databases: MySQL, Oracle Structured Query Language

Data Visualization : Tableau, Microsoft Power Business Intelligence

Technologies : HTML, SQL, CSS, Selenium, Jenkins, Docker
